

## Necklace Sizing Guide

### Procedure to measure necklace size:

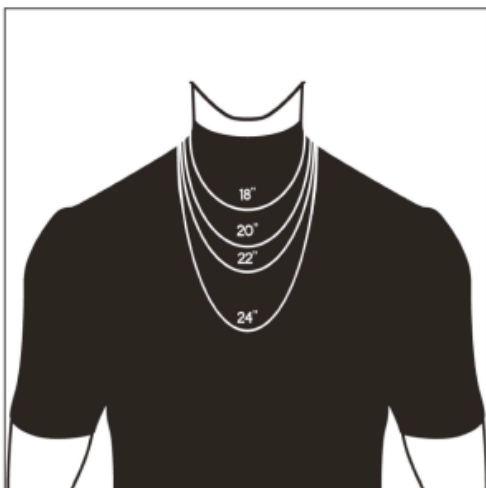

To ensure you can adorn your new necklace you'll want it to be the correct size. Measuring a necklace length is very easy. We suggest finding a necklace you already own that is the size you wish your new piece to be.

- Step 1: Unclasp this necklace.
- Step 2: Lay it out flat next to a ruler or measuring tape.
- Step 3: Note it's measurement in inches or centimeters.
- Step 4: This will give you the length that you should be looking for when buying a new chain.

Don't worry if you do not have a necklace at home, measure your neck size. Neck size is probably the most important measurement for determining which necklace length will work best for you. To measure, wrap a soft tape measure around your neck, keeping the tape measure parallel to the floor as you measure. Then, add 2 to 4 inches (5 to 10 cm) to your neck measurement to calculate your minimum recommended chain length.

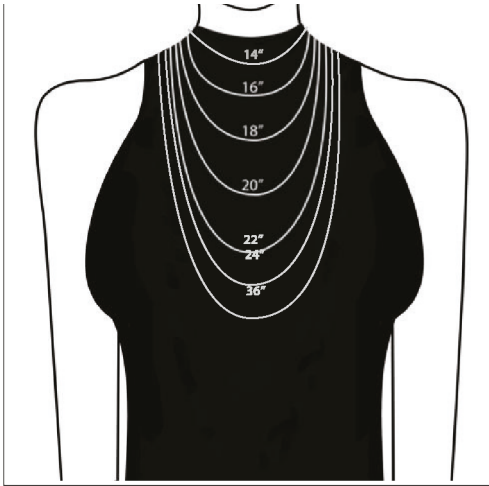

### Men's Standard Necklace Sizes:

Length	Placement
18"	Falls just around the base of the neck.
20"	Falls right at the collarbone.
22"	Falls few inches below the collarbone.
24"	Falls just above the sternum.

## Necklace Sizing Guide
